Verysell Group
Advanced AI and Information Technologies

The Verysell Group Introduction

Verysell Group
Advanced AI and Information Technologies

35 Years of Innovation

- Founded in 1990, Verysell Group is a renowned global software development company, headquartered in Switzerland.

- Verysell offers a variety of services from staff augmentation to the scope, design, and building of bespoke software solutions for a range of industries such as BFSI, Retail, Ecommerce, Education, Healthcare, Manufacturing.

- We help startups, mid-sized and enterprise-grade software companies in Europe, Africa and Asia to navigate the common bottlenecks to software deployment such as talent acquisition, operational gaps and the time and resources it takes to manage and lead development teams efficiently.

- Our global operations team has mastered a unique **Onshore Leadership + Offshore Development model** delivering high-level expertise and rapid execution, while remaining flexible to your budget.

VALUE PROPOSITION

SmartDev
A Verysell Group Company

AI-Driven Efficiency with Cost-Effective Expertise

Specializing in **cost-effective** software outsourcing, we combine top expertise with **AI-driven innovation** to **deliver high-quality solutions faster and more efficiently.**

Business Stability with Commitment from EU based group as business owners

Business Stability with the Commitment from the EU based group as business owner. **High Retention Rate and Growth Rate**.

Effective and Flexible Delivery Models (Onshore – Offshore – Hybrid – Nearshore)

With **2 Development Centers** in **Vietnam** (Da Nang & Hanoi) and over **200 employees**, SmartDev can **easily and flexibly** adapt to any **delivery model**.

SmartDev
AI Powered Software Development

Excellent English competency

With **80%** of staff fluent in **English** and **10% native English-speaking expats** in client-facing teams across **London, Dubai, and Vietnam**, the company ensures effective communication. Operating under the **AGILE model**, all team members can speak **fluent English**.

Expert-Led Innovation in Finance & AI

Our focus is on **high-value services** where we have strong in-house expertise & synergies, particularly in **Financial services and AI technologies.**

Quality of Service with strong track records

Following **European processes** and **standard qualifications**, the company is highly regarded by clients, evidenced by a **95% client retention rate**. Additionally, **80%** of clients opt for a **second service** as an extension of their initial project.

At SmartDev, we use AI to build faster, smarter and more reliable software.

SmartDev
A Verysell Group Company

SmartDev AI-Powered Software Development

Human + AI Synergy

AI speeds up tasks, but humans validate, customize, and enhance every step.

Security First

AI-powered coding follows strict security policies and industry best practices.

Transparent Codebase

No hidden AI dependencies— clients get full control over the final product.

Clear ROI Metrics

We provide measurable outcomes to prove AI's impact on speed, quality, and cost.

AI-Powered Software Development integrates AI across the entire development lifecycle — from planning to deployment. At SmartDev, we use AI to build faster, smarter, and more reliable software by automating tasks, enhancing code quality, and enabling predictive operations. This leads to shorter delivery cycles, fewer errors, and greater value for our clients.

AI at the Core: Transforming Development at SmartDev

windsurf

CURSOR

GitHub Copilot

- Utilize GitHub Copilot, Cursor, and Windsurf for real-time code generation, boilerplate creation, and in-line documentation, along with AI-driven code navigation, smart refactoring, and rapid debugging—ideal for large or legacy codebases.

PR-Agent

- PR Agent auto-analyzes pull requests, summarizes changes, detects anomalies, and provides actionable feedback directly inside GitHub.

ChatGPT

- Internal AI copilots generate unit and integration test cases from source code.
- They simulate edge cases and surface untested logic automatically during development.

Jira

- AI models analyze sprint performance, developer activity, and issue resolution trends.
- Insights help in sprint retrospectives, planning, and risk mitigation.

Next-Gen Countdown App: Innovating User Engagement with SmartDev

Industry: Productivity Tool

Head-counts (AI Engineers, QA Engineer, UI/UX Designer, Backend Engineer)

Ongoing (Since 2024)

Germany

Challenge

Our client faced the challenge of integrating AI-generated content and digital avatars into their mobile app, requiring SmartDev to use advanced technologies to ensure personalized, contextually relevant content while maintaining a seamless user experience.

Additionally, ensuring the app's scalability, performance, and security, especially with GDPR compliance, added complexity. Cross-cultural collaboration between the company and SmartDev also presented communication challenges, which were further intensified by the tight four-month timeline for MVP development, demanding a highly efficient and agile approach.

Solution

SmartDev tackled the challenges by leveraging their AI and agile development expertise. They used advanced AI models like Claude.ai and LLaMa 2 to create modular, scalable components, smoothly integrating them into the app. The team adopted a microservices architecture to optimize performance and support growth. To ensure security and GDPR compliance, SmartDev implemented end-to-end encryption, secure API management, and regular audits. The architecture allowed seamless scaling as the user base grew. Employing an agile methodology with regular sprints and real-time feedback, SmartDev kept the project on track despite the tight timeline. They addressed cross-cultural communication challenges through regular virtual meetings and a workshop in Da Nang to align project goals.

AI-Driven Media Engagement Platform for a Leading Journalism and PR Marketplace

SmartDev
A Verysell Group Company

Industry: Journalism & Media Industry

5 Head-counts (1 AI Architect, 1 AI engineer, 1 Full Stack PHP developer, 1 QA, 1 Project Manager)

12 Months

United Kingdom

Challenge

Legacy Technology and Data Overload: Synapse struggled with outdated technology, leading to an overwhelming influx of irrelevant PR pitches, obstructing effective communication and reducing opportunities for impactful storytelling.

Complex Integration Requirements: Upgrading the PHP-based platform to incorporate advanced AI capabilities for personalized recommendations and content suggestions required careful planning, presenting a challenge in maintaining robustness and user-friendliness.

Solution

Targeted AI Development: SmartDev clarified project requirements by focusing on AI-driven functionalities, ensuring clear direction and effective progress. This approach aligned the development process with the client's specific needs, resulting in a more tailored solution.

Scalable Integration: SmartDev developed a flexible codebase for seamless integration with the existing PHP framework and third-party systems. This not only enhanced data handling but also laid a robust foundation for future scalability, accommodating new functionalities and increased data volumes.

The 1st Prepaid Payment Card in France

SmartDev
A Verysell Group Company

PCS

Industry: Banking & Finance

22 Head-counts

18 Months
iOS, Android App & Bank integrations

France

Challenge

PCS wanted to provide a flexible card-based payment solution, which would not require stringent financial checks or link to a bank account. Users simply atop up their card and can then enjoy spending everywhere.

PCS wanted a mobile wallet pp that allowed cardholders with a mobile phone to operate a virtual bank account.

Solution

We built the backend management platform that handled all transactions, logged and tracked of workflows and integrated with PCS and Mastercard's platform services.

The platform had to handle and distribute all requests to complete transactions made by wallet owners; supporting checkout, transfers and card management requests. Additionally, the platform supported user management, KYC, transaction monitoring and auditing.

A Verysell Group Company

Industry: Productivity Tool

4 Head-counts (1 PM, 1 SA, 1 Tech Led, 1 Developer)

3 Months Application Development & Integration Services

Saudi Arabia

Challenges

Legacy Systems and External Applications: Our client relied on legacy systems, on-premise databases, and third-party applications that lacked built-in connectors. Integrating disparate systems required extensive customization to ensure smooth data flow and interoperability without compromising security or performance.

Scalability for Large Datasets: Their app needed to process large amounts of data efficiently. However, retrieving and managing extensive datasets caused performance bottlenecks, slowing down the applications and affecting user experience.

Solution

Integration with Legacy Systems: SmartDev used **Power Automate** to create automated workflows and API-based integrations. Where standard connectors were unavailable, custom connectors were built to ensure secure and flexible integration. The On-Premises Data Gateway was also set up to safely connect PowerApps with in-house databases, maintaining data integrity and security.

Optimizing Performance: Queries were optimized using indexed columns to make data retrieval faster. Heavy processing tasks were moved to Azure Functions and Power Automate, improving speed and scalability for growth.
